

## Operaciones básicas con fracciones...

### Actividad

Realiza la siguiente suma de fracción

$$\frac{1}{8} + \frac{6}{8} = \frac{7}{8}$$

$$\frac{4}{3} + \frac{6}{3} = \frac{10}{3}$$

$$\frac{7}{2} + \frac{9}{6} = \frac{42 + 18}{12} = \frac{60}{12} = 5$$

$$\frac{10}{5} + \frac{5}{7} = \frac{25 + 30}{35} = \frac{55}{35}$$

$$\frac{12}{2} + \frac{8}{2} = \frac{20}{2} = 10$$

De Fracción mixta a impropia

$$2 \frac{5}{4} = \frac{13}{4}$$

$$7 \frac{6}{3} = \frac{27}{3}$$

$$4 \frac{4}{5} = \frac{34}{5}$$

$$\frac{6}{8} - \frac{2}{8} = \frac{6-2}{8} = \frac{4}{8} = \frac{1}{2} \quad \frac{15}{3} - \frac{6}{3} = \frac{15-6}{3} = \frac{9}{3} = 3$$

$$\frac{7}{2} - \frac{9}{6} = \frac{42-18}{12} = \frac{24}{12} = \frac{12}{6} = \frac{6}{4} = \frac{4}{3} \quad \frac{18-16}{12} = \frac{2}{12} = \frac{1}{6}$$

$$\frac{10}{5} - \frac{5}{7} = \frac{70-25}{35} = \frac{45}{35}$$

$$\frac{12}{2} - \frac{8}{2} = \frac{12-8}{2} = \frac{4}{2} = 2$$

$$= \frac{8}{5} + \frac{51}{5}$$

$$= \frac{2}{5} + \frac{01}{5}$$
